## Loading Guide

**Supports vehicles and equipment exceeding 100 tonnes, subject to ground conditions.**

This loading guide is for firm, dry ground. If the weather is likely to turn wet, or the job duration is in excess of a week, please ask for advice about using a more heavy-duty product.

It is the user's responsibility to assess the load-bearing capacity of the ground, and to only operate vehicles within the weight that the ground is capable of safely supporting. Please visit website for terms of guarantee.

Interlocking joints provide increased weight distribution

Prominent tread design suitable for walkways and tyre-equipped vehicles

Low profile tread pattern for steel-tracked vehicles

Standard bolted connection system results in affordable replacements
